## Eden *Project*

Eden is delighted to announce that their partnership with UNICEF has now been confirmed. Eden Europe has committed 50,000 euros to the UNICEF 'Gardo' project. Gardo is located on the Sool plateau, in the Karkaar region of Somalia.

The resident population of Gardo is an estimated 5100 families; approximately 30,600 people. It is estimated that as many as 1000 destitute families live in the town's outskirts in slum settlements near the major boreholes.

Eden's financial contribution to this project will help many people to gain access to clean, fresh, safe drinking water, and allow them a better standard of health and a better standard of life.

Eden UK are also putting together initiatives to raise a further £25,000 for this UNICEF project.
